

Project Initialization and Planning Phase

Date	15 July 2026
Team ID	XXXXXX
Project Title	Human Development Index (HDI) Predictor
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	Develop a machine learning web application to predict the Human Development Index (HDI) using key socio-economic indicators.
Scope	Preprocess HDI data, train a Linear Regression model, and deploy it using Flask for real-time prediction.
Problem Statement	
Description	Manual HDI analysis is time-consuming and requires evaluating multiple development indicators.
Impact	A prediction system enables faster analysis and supports research and decision-making.
Proposed Solution	
Approach	Train a Linear Regression model on the HDI dataset and integrate it into a Flask web application.
Key Features	HDI Score Prediction, Development Category Classification, Simple Web Interface, Real-time Prediction

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Processor	Intel Core i3 or above
Memory	RAM	8 GB
Storage	Disk Space	1 GB Free Space
Software		
Frameworks	Web Framework	Flask
Libraries	Python Libraries	pandas, numpy, scikit-learn, matplotlib, seaborn, joblib
Development Environment	IDE	Visual Studio Code
Data		
Data	Source, format	Human Development Index and Components Dataset (.csv)
